

# DIGITAL COLLABORATION, BUILT FOR GOVERNANCE

**Designed specifically for government and regulated industries, Objective Connect is a secure external file sharing application that gives complete control over the information you share outside your organisation.**

**Share documents with 3 to 300 people in a single Workspace. Stay one step ahead with real-time updates and courtroom-ready audit reports: prove who accessed, downloaded, contributed to or shared your information.**

## OBJECTIVE CONNECT STANDARD

Objective Connect Standard is the trusted file sharing platform which allows organisation to share sensitive documents with external parties. Users can create private workspaces and invite participants in the Cloud in a matter of seconds. The collaboration, reporting, security and compliance features allow governments and regulated industries the ability to work externally while having piece of mind.

### Collaboration and Productivity

Create a workspace and share information with the invited participants in your network, create tasks and provide comments on content you are working on.

### Government Grade Security

Hosted in the Microsoft Azure Government Data Centre to ensure your content is in the most trusted protected environment.

### Compliance

ISO27001 accredited, ASD IRAP assessed, G-Cloud framework compliant.

## OBJECTIVE CONNECT ENTERPRISE

Objective Connect Enterprise extends the capabilities of the Standard edition to introduce broader use of Objective Connect to facilitate advanced collaboration features such as allowing multi-workgroup creation, advanced forensic level reporting through the Workspace Record, integration capability through our Objective Connect Link service for Objective ECM, Micro Focus Content Manager, Microsoft SharePoint, inclusion of Premium Support along with a dedicated Account Manager.

### Advanced Collaboration and Productivity

Have the option to administer multi-workgroups, which gives your organisation the ability to scale and deliver secure collaboration to multiple business units, project teams and committees.

### Forensic Level Reporting

The visibility to capture every step of a collaboration event or long running activity. You can also oversee who in your workgroup is sharing information. Conduct audits on who did what and when.

### Seamless Integration

Connect to various Content Services providers including Objective ECM, Microsoft SharePoint and Micro Focus Content Manager.

### Premium Support

As an Enterprise Edition customer you have access to Premium Support to give you peace of mind knowing that your most important collaboration activities are supported via email and telephone during your local business hours.

**30 DAY TRIAL**
