Objective CONNECT

DIGITAL COLLABORATION, BUILT FOR GOVERNANCE

Objective Connect revolutionises the way organisations collaborate in their trusted partner network. Simplifying the ability to communicate on a secure platform in providing real time communication on information of importance that matters. Having visibility of where content is within your workflow and delivering seamless integration into your mission critical systems. Effortless. Simple. Connect.

OBJECTIVE CONNECT STANDARD

Objective Connect Standard is a secure content collaboration platform built for governance. Objective Connect Standard delivers the ability to share information with external trusted partners where users can create secure, private workspaces in the Cloud to collaborate taking sveconds to setup and invite participants and collaborate with your network. The collaboration and productivity, reporting, security and compliance features allow governments and content sensitive environments the ability to share and collaborate easily and with peace of mind.

Collaboration and Productivity

Create a workspace and share information with the invited participants in your network, create tasks and provide comments on content you are working on.

Government Grade Security

Hosted in the Microsoft Azure Government Data Centre to ensure your content is in the most trusted protected environment.

Compliance

ISO27001 accredited, ASD IRAP assessed, G-Cloud framework compliant.

OBJECTIVE CONNECT ENTERPRISE

Objective Connect Enterprise extends the capabilities of the Standardedition to introduce broader use of Objective Connect to facilitate advanced collaboration features such as allowing multi-workgroup creation, advanced forensic level reporting through the Workspace Record, integration capability through our Objective Connect Link service for Objective ECM, Micro Focus Content Manager, Microsoft SharePoint, inclusion of Premium Support along with a dedicated Account Manager.

Advanced Collaboration and Productivity

Have the ability to administer multi-workgroups which gives your organisation the ability to scale and deliver secure collaboration to multiple business units, project teams and committees.

Forensic Level Reporting

The visibility to capture every step of a collaboration event or long running activity. You can also oversee who in your workgroup is sharing information with you, where and when and conduct audits.

Seamless Integration

Connect to various Content Services providers including Objective ECM, Microsoft SharePoint and Micro Focus Content Manager.

Premium Support

As an Enterprise Edition customer you have access to Premium Support to give you peace of mind knowing that your most important collaboration activities are supported via email and telephone support during your local business hours.
